Concerned About Development Learning Collaborative:

Better results for you and the children you serve.

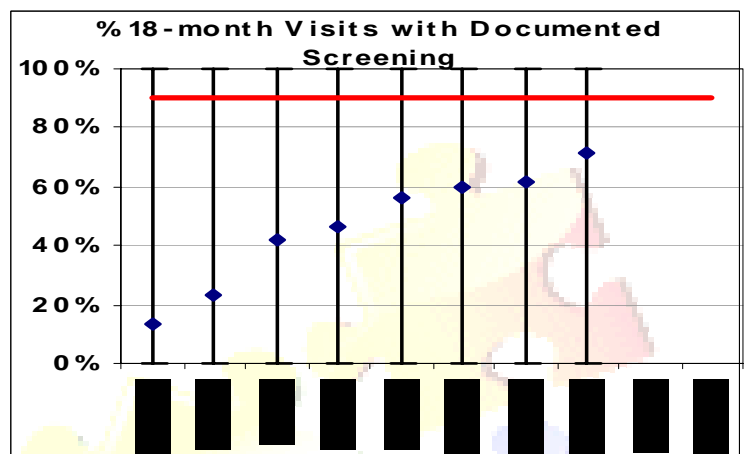

This baby was not my first. I knew in that scary secret part of my heart that something wasn't right from the moment that they handed him to me and I tried to feed him. By the time he was 7 months old I had taken him to at least 4 different doctors (3 pediatricians). I wish it was easier to find the services that are out there. I wish the local pediatricians would be more involved in bringing more services here.

Tani, parent, Arlington, OH

Our family has been blessed from the early diagnosis and treatment our children have received. I cannot say enough about how important it is to have children screened and diagnosed early. A child's brain is like a sponge and the earlier we can intervene, the better the outcomes and lives of these innocent and gifted children. They deserve every opportunity to achieve their maximum potential.

Tracy, mother of Brandon, Alyssa and Nicholas

Parents of children who have developmental problems in Ohio said it took more than *two years* to get a diagnosis from their moment of first concern. *You can make things better.*

Results from Ohio practices who participated in the Pilot Collaborative.

The Concerned About Development Learning Collaborative. Better results for you and the children you serve.
